

A Social Story about the Corona Virus.

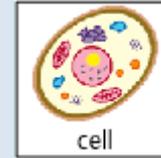

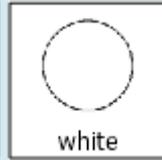

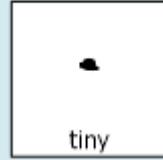

All around the World there is a virus.

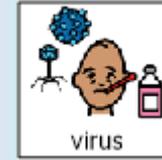

The virus can make people feel very hot and give them a cough..

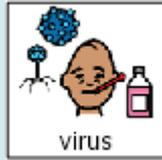

The virus lives in the body's blood system.

Everyone has tiny white blood cells in their body.

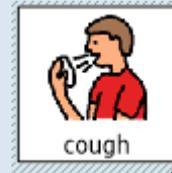

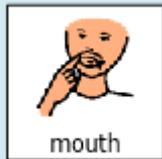

that help to fight and stop the virus.

To stop the virus it is important that we.....

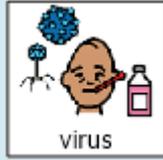

1. Wash your hands with soap, lots of times.

2. Cover your mouth if you cough.

stop

virus

spreading

we

stay at home

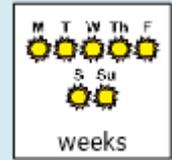

To stop the virus spreading we should stay at home.

you

no school

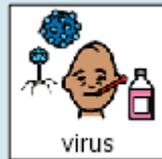

weeks

You will not come to school for a few weeks.

stop

virus

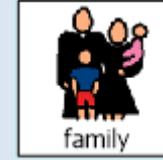

spreading

friends

This will stop the virus spreading to friends.

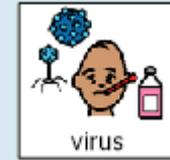

You will stay at home with your family.

Your teacher will give you tasks to do at home.

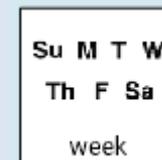

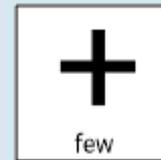

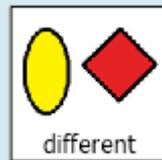

The tasks will be learning for all your classes.

You will come back to school when the virus

Has gone and it is safe to be with other people.

It will be different for a few weeks.
